CONTENTS OF VOLUME 200

NUMBER 1, MARCH 1980

INVITED PAPER

Spin Trapping of Superoxide and Hydroxyl Radical: Practical Aspects
Eli Finkelstein, Gerald M. Rosen, and Elmer J. Rauckman 1

COMMUNICATION

Stoichiometry of Homopolynucleotide Binding to *Escherichia coli* Translational Initiation Factor 3 *Eric Wickstrom, R. Weslie Tyson, Grace Newton, Richard Obert, and Erica E. Williams* 296

BIOLOGICAL OXIDATION AND BIOENERGETICS

NADPH-Driven Lipid Peroxidation in Rat Liver Nuclei and Nuclear Membranes
Malcolm B. Baird, Linda S. Birnbaum, and George T. Sfeir 108

Differences in the Mechanism of NADPH- and Cumene Hydroperoxide-Supported Reactions of Cytochrome *P*-450
J. Capdevila, R. W. Estabrook, and R. A. Prough 186

Model Studies of the α-Peroxidase System: Formation of an Electronically Excited Product
Marcela Haun, Nelson Durán, Ohara Augusto, and Giuseppe Cliento 245

ENZYME MECHANISMS AND METABOLISM

Fructose Bisphosphate Aldolase from Rabbit Muscle. A New, Acid-Labile Intermediate of the Aldolase Reaction and the Partition of the Enzyme among the Catalytic Intermediates at Equilibrium
Enrico Grazi and Giorgio Trombetta 31

Biosynthesis of Polymyxin by *Bacillus polymyxa*. I. The Status of the Biosynthetic Multienzyme Complex during Active Antibiotic Synthesis and Sporulation
N. Vasantha, R. Balakrishnan, Satwant Kaur, and Kunthala Jayaraman 40

Biosynthesis of Polymyxin by *Bacillus polymyxa*. II. On the Nature and Interaction of the Multienzyme Complex with the End Product Polymyxin
R. Balakrishnan, Satwant Kaur, A. K. Goel, S. Padmavathi, and Kunthala Jayaraman 45

Kinetic Parameters for the Activation of α- and β-Trypsins by the Methyl Ester of Tosyl-L-Arginine (Tos-L-Arg-OMe)
Neuza M. Magalhães-Rocha, Edyr Rogana, and Marcos Mares-Guia 61

Purification of Thymidine Kinase by Affinity Chromatography with an Enzyme Inhibitor as the Ligand *R. Madhav, Mona L. Coetzee, and Peter Ove* 99

Interactions of Methylmalonyl CoA Mutase from Normal Human Fibroblasts with Adenosylcobalamin and Methylmalonyl CoA: Evidence for Non-equivalent Active Sites *Huntington F. Willard and Leon E. Rosenberg* 130

γ-Aminobutyrate:α-Ketoglutarate Aminotransferase from *Pseudomonas* sp. F-126: Purification, Crystallization, and Enzymologic Properties
Kazuo Yonaha and Seizen Toyama 156

LIPIDS

Acyl CoA:Cholesterol Acyl Transferase Activity in Human Placental Microsomes: Inhibition by Progesterone *Evan R. Simpson and Martin F. Burkhart* 79
Regulation of Cholesterol Metabolism by Human Choriocarcinoma Cells in Culture: Effect of Lipoproteins and Progesterone on Cholesteryl Ester Synthesis
Evan R. Simpson and Martin F. Burkhart 86

MEMBRANE STRUCTURE AND FUNCTION

Spin Label Studies of Microsomal Membranes from *Acanthamoeba castellanii* in Different States of Differentiation
K. P. Pauls, J. E. Thompson, and J. R. Lepock 22
Transport of Methotrexate in L1210 Cells: Effect of Ions on the Rate and Extent of Uptake *Gary B. Henderson and Edward M. Zevely* 149
Nucleotides Do Not Modulate Rate Luteocyte Human Chorionic Gonadotropin Responsiveness by Inhibiting Human Chorionic Gonadotropin Binding
Andrew R. LaBarbera, Nancy D. Richert, and Robert J. Ryan 177
Immunological Dissimilarity of the Calcium Pump Protein of Skeletal and Cardiac Muscle Sarcoplasmic Reticulum
Paul H. DeFoor, Dmitri Levitsky, Tatjana Biryukova, and Sidney Fleischer 196
Asymmetric Incorporation of Na^+-, K^+-ATPase into Phospholipid Vesicles
Richard L. Jackson, Arie J. Verkleij, Everardus J. J. van Zoelen, Lois K. Lane, Arnold Schwartz, and Laurens L. M. van Deenen 269

BIOCHEMISTRY OF VIRUSES AND NUCLEIC ACIDS

Hydrodynamic Shearing by VirTis Blending Conserves Nucleosome Structure of Rat Liver Chromatin *L. V. Rodriguez, J.-N. Lapeyre, D. L. Robberson, A. L. Maizel, and F. F. Becker* 116

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

Temperature Dependence of the Absolute Fluorescence Yields of Chloroplast Fragments
S. M. Kochubey, E. G. Samokhval, G. V. Klimusheva, and A. A. Delukov 65
Substrate Specificity *in Vivo* and *in Vitro* in the Formation of Stilbenes. Biosynthesis of Rhaponticin *Norbert Rupprich, Heinz Hildebrand, and Helmut Kindl* 72
The Effect of Light on Four Protochlorophyllide-Binding Polypeptides of Barley (*Hordeum vulgare*) *Tom E. Redlinger and Klaus Apel* 253

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

Terbium Binding to Troponin C: Binding Stoichiometry and Structural Changes Induced in the Protein
P. C. Leavis, B. Nagy, S. S. Lehrer, H. Bialkowska, and J. Gergely 17
Correlation of Proton Release and Ultraviolet Difference Spectra Associated with Metal Binding by Transferrin *Michael H. Gelb and Daniel C. Harris* 93

Interaction of Melanin with Oxygen
Tadeusz Sarna, Antoni Dulęba, Witold Korytowski, and Harold Swartz 140
Study of the Neurotoxic Complex and Its Components from the Venom of the Bulgarian Sand Viper *Vipera ammodytes ammodytes*. Interaction of the Acidic Components with Cations *T. G. Bukolova-Orlova, N. Ya. Orlov, E. A. Burstein, B. P. Chorbanov, and B. Aleksiev* 216
Relaxation Times and Size Distribution Readjustments in Micellar Kinetics
Gerson Kegeles 279
Molecular Transitions of Human Thyroxine-Binding Globulin
Michael L. Johnson, Roland E. Lippoldt, Marvin C. Gershengorn, Jacob Robbins, and Harold Edelhoch 288

PROTEIN STRUCTURE AND FUNCTION

Effect of Temperature on the Stability and Activity of Crystalline Ox Liver Nuclear and Mitochondrial Glutamate Dehydrogenases
Gianfranco Di Matteo, Giovanni Romeo, and Guido Di Prisco 55
Heterogeneity of ^{125}I-Labeled Tetanus Toxin in Isoelectric Focusing on Polyacrylamide Gel and Polyacrylamide Gel Electrophoresis *Birgit an der Lan, William H. Habig, M. Carolyn Hardegree, and Andreas Chrambach* 206

REGULATION OF METABOLISM AND OF ENZYME ACTION

Regulation of Prephenate Dehydratase in Coryneform Species of Bacteria by L-Phenylalanine and by Remote Effectors
Akram M. Fazel and Roy A. Jensen 165
Alterations in Plasma Membrane Proteins Associated with the Proteolytic Activation of Adenylate Cyclase *M. Olivia Pinkett and Wayne B. Anderson* 261

HORMONE STRUCTURE AND FUNCTION

The Nature of the Cytosolic Activators of the Adrenal Steroid 21-Hydroxylation System *Laura Ponticorvo, Norma Greenfield, Adele Wolfson, Fred Chasalow, and Seymour Lieberman* 223
Activation and Inhibition of the Adrenal Steroid 21-Hydroxylation System by Cytosolic Constituents: Influence of Glutathione, Glutathione Reductase, and Ascorbate
Norma Greenfield, L. Ponticorvo, F. Chasalow, and S. Lieberman 232
ERRATUM 301

NUMBER 2, APRIL 1, 1980

COMMUNICATION

Highly Purified "Flavanone Synthase" from Parsley Catalyzes the Formation of Naringenin Chalcone *Werner Heller and Klaus Hahlbrock* 617

BIOLOGICAL OXIDATION AND BIOENERGETICS

Specificity of the Chlorophyll-to-Protein Binding in the Chlorophyll–Protein Complexes of the Thylakoid
J. H. Argyroudi-Akoyunoglou and A. Castorinis 326

Proteolysis of Chloroplast Thylakoid Membranes. I. Selective Degradation of Thylakoid Pigment–Protein Complexes at the Outer Membrane Surface
David P. Carter and L. Andrew Staehelin 364

Proteolysis of Chloroplast Thylakoid Membranes. II. Evidence for the Involvement of the Light-Harvesting Chlorophyll *a*/*b*–Protein Complex in Thylakoid Stacking and for Effects of Magnesium Ions on Photosystem II-Light-Harvesting Complex Aggregates in the Absence of Membrane Stacking
David P. Carter and L. Andrew Staehelin 374

Evidence that Cytochrome *b* Is the Antimycin-Binding Component of the Yeast Mitochondrial Cytochrome bc_1 Complex
Henry Roberts, Stuart C. Smith, Sangkot Marzuki, and Anthony W. Linnane 387

Identification and Subcellular Localization of Catalase Activity in Bovine Adrenal Medulla and Cortex *Christopher J. Pazoles, C. Elwood Clagget, Carl E. Creutz, Harvey B. Pollard, and Eugene C. Weinbach* 434

Stimulation of Yeast Mitochondrial Protein Synthesis by Postpolysomal Supernatants from Yeast, Rat Liver, and *Escherichia coli*
Terry D. Everett, Eric Finzi, and Diana S. Beattie 467

Purification of Rat Liver Phenylalanine Hydroxylase by Affinity Chromatography
Jasim M. Al-Janabi 603

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

A Radioimmunoassay for Human Glucose Phosphate Isomerase: Measurement of Immunoreactive Enzyme from Genetic Variants
Kimberly L. Purdy, Steven Jones, H-H. Tai, and R. W. Gracy 485

ENZYME MECHANISMS AND METABOLISM

Purification and Characterization of Pyruvate Kinase from *Trypanosoma brucei*
Ian W. Flynn and Iain B. R. Bowman 401

p*K* Perturbations of Nitrophenol-Containing Reporter Groups at the Active Site of Papain *Elva Mae Nicholson and Jules A. Shafer* 560

Studies on the Interaction of Heparin with Thrombin, Antithrombin, and Other Plasma Proteins
Maria O. Longas, William S. Ferguson, and Thomas H. Finlay 595

LIPIDS

Prenyl Transferases from *Micrococcus luteus*: Characterization of Undecaprenyl Pyrophosphate Synthetase *Tsuneo Baba and Charles M. Allen* 474

MEMBRANE STRUCTURE AND FUNCTION

Enhancement of α-Methylglucoside Efflux by Respiration in Resporatory Mutants of *Escherichia coli* K-12
Mercedes Hernandez-Asensio and Francisca F. Del Campo 309

Proton Movements across the Membranes of Sarcoplasmic Reticulum during the Uptake of Calcium Ions *Vitor M. C. Madeira* 319

Effect of Acylphosphates on Ca^{2+} Uptake by Sarcoplasmic Reticulum Vesicles
Gianfranco Liguri, Massimo Stefani, Andrea Berti, Paolo Nassi, and Giampietro Ramponi 357

BIOCHEMISTRY OF VIRUSES AND NUCLEIC ACIDS

Effect of 5-Iodo-2′-deoxyuridine on Physical Properties and Nonhistone Chromosomal Proteins of Chromatin from Burkitt Somatic Cell Hybrids
Jung-Chung Lin and Joseph S. Pagano 567

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

Redox Reactions on the Reducing Side of Photosystem II in Chloroplasts with Altered Herbicide Binding Properties
Jane Bowes, A. R. Crofts, and C. J. Arntzen 303

Biosynthesis of Monoterpenes: Conversion of the Acyclic Precursors Geranyl Pyrophosphate and Neryl Pyrophosphate to the Rearranged Monterpenes Fenchol and Fenchone by a Soluble Enzyme Preparation from Fennel (*Foeniculum vulgare*) *Rodney Croteau, Mark Felton, and Robert C. Ronald* 524

Biosynthesis of Monoterpenes: Preliminary Characterization of *l-endo*-Fenchol Synthetase from Fennel (*Foeniculum vulgare*) and Evidence that No Free Intermediate Is Involved in the Cyclization of Geranyl Pyrophosphate to the Rearranged Product *Rodney Croteau, Mark Felton, and Robert C. Ronald* 534

Autocatalysis and Light Activation of Enzymes in Relation to Photosynthetic Induction in Wheat Chloroplasts *R. C. Leegood and D. A. Walker* 575

Prenyltransferase from *Gossypium hirsutum*
Robert Widmaier, Jean Howe, and Peter Heinstein 609

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

A Calorimetric Study of the Binding of 2′-Deoxyuridine-5′-Phosphate and Its Analogs to Thymidylate Synthetase
Norman V. Beaudette, Neal Langerman, and Roy L. Kisliuk 410

Solvation of Lysozyme in Water/Dioxane Mixtures Studied in the Frozen State by NMR Spectroscopy *Taro Izumi, Yohko Yoshimura, and Hideo Inoue* 444

Coordination Chemical Studies on Metalloenzymes. Measurement of Binding Constant between Apo-tyrosinase and Copper Ion
Yoshinori Kidani, Kazuyuki Ohkuma, Junzo Hirose, and Masahide Noji 452

An X-Ray Study on the Interaction between Indole Ring and Pyridine Coenzymes: Crystal Structure of 1-Methyl-3-carbamoylpyridinium: Indole-3-acetic Acid (1:1) Monohydrate Charge–Transfer Complex
Toshimasa Ishida, Ken-Ichi Tomita, and Masatoshi Inoue 492

PROTEIN STRUCTURE AND FUNCTION

Formation of Active Isozymes I and III by Reassociation of Separated Subunits of Isozyme II of Alkaline Phosphatase
Michael Cocivera, James McManaman, and Irwin B. Wilson 396

Simultaneous Purification and Comparative Characterization of Six Serine Hydrolases from Rat Liver Microsomes
Rolf Mentlein, Stefan Heiland, and Eberhard Heymann 547

Inactivation of Chicken Liver D-3-Phosphoglycerate Dehydrogenase by *N*-Alkylmaleimides *Bruce M. Anderson and Robert E. Dubler* 583

PROTEIN SYNTHESIS

Purification and Properties of a Second Antiviral Protein from *Phytolacca americana* which Inactivates Eukaryotic Ribosomes
James D. Irvin, Thomas Kelly, and Jon D. Robertus 418

REGULATION OF METABOLISM AND OF ENZYME ACTION

Studies on the Regulation of Leucine Catabolism. Mechanism Responsible for Oxidizable Substrate Inhibition and Dichloroacetate Stimulation of Leucine Oxidation by the Heart
Ronald M. Sans, Walter W. Jolly, and Robert A. Harris 336

Polyglutamylfolate Synthesis in *Neurospora crassa*: Changes in Pool Size following Growth in Glycine- and Methionine-Supplemented Media
Pak-Yu Chan and E. A. Cossins 346

Turnover of Liver Pyruvate Kinase *Christos Cladaras and G. Larry Cottam* 426

Plant Pyruvate Dehydrogenase Complex: Inactivation and Reactivation by Phosphorylation and Dephosphorylation
K. Prasad Rao and Douglas D. Randall 461

The Metabolism of Serine and Glycine in Mutant Lines of Chinese Hamster Ovary Cells *Walter Pfendner and Lewis I. Pizer* 503

The Identity and Nuclear Uptake of a Cytosolic Binding Protein for 3-Methylcholanthrene *Brian Tierney, Donald Weaver, Nicholas H. Heintz, Warren I. Schaeffer, and Edward Bresnick* 513

Significance of the Enzyme Complex That Synthesizes UMP in Ehrlich Ascites Cells
Thomas W. Traut 590

ERRATUM 620

AUTHOR INDEX FOR VOLUME 200 621

The Subject Index for Volume 200 will appear in the December 1980 issue as part of a cumulative index for the year 1980.

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
111 Fifth Avenue
New York, New York 10003

Failure to receive the required number of copies of the manuscript may delay review.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Resubmitted manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. They should not exceed five printed pages (approximately 4500 words), including tables and illustrations.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $^3/_{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1969. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195,** 255–260.
2. METZLER, D. E. (1977) Biochemistry: The Chemical Reaction of Living Cells, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) *in* The Proteins (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246–409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
